

Table of Contents

Foreword.....	1
1. Introduction.....	3
2. Approved Methods.....	6
3. Sampling.....	7
4. Sample Preservation and Holding Times.....	8
5. Equipment Requirements.....	9
a. Measurement of Dissolved Oxygen (DO).....	9
b. Thermometers.....	10
c. Incubator (Water or Air).....	10
d. Dilution water container.....	11
e. BOD Bottles.....	11
6. Reagents.....	12
a. Buffer.....	12
b. Nutrients.....	12
c. Standards.....	12
7. Pretreatment of Samples.....	13
a. Sample Prep.....	13
b. Temperature.....	14
c. Adjustment of pH.....	14
d. Dechlorination.....	15
d. Other Toxic Substances.....	15
e. Supersaturated Samples.....	16
f. Nitrification Inhibition.....	16
8. Procedure.....	18
a. Preparation of Dilution Water.....	18
b. Estimating BOD ₅	21
c. Seeding.....	21
d. Dilution of Samples.....	26
e. Determination of Initial DO.....	28
f. Incubation.....	29
g. Determination of Final DO.....	30
9. Calculations/Data Recording.....	30
a. Dilution Factor.....	30
b. BOD - Not Seeded.....	31
c. BOD - Seeded.....	31
d. Benchsheet.....	33
e. Reporting Results.....	34
10. Quality Assurance/Quality Control.....	34
a. Minimum DO Depletion and Retention Criteria.....	34

b. Blanks.....	35
c. Check Standard.....	38
d. Duplicates.....	39
e. Evidence of Toxicity.....	39
11. Method Performance Summary.....	.39
a. Bias.....	39
b. Precision.....	40
c. Detection Limit.....	40
d. Working Limits.....	41
12. References.....	41

Tables

1. Comparison of BOD ₅ , CBOD ₅ , COD, and TOC Values in WP Studies.....	5
2. Common BOD ₅ Ranges for Various Waste Systems.....	8
3. Typical BOD Dilutions.....	14
4. Solubility of Oxygen in Water - Various Pressures and Temperatures...17	
5. Expected Values for a 300 mg/L KHP Standard.....	25
6. Typical Seed Control Check.....	26
7. Convincing Evidence of "Toxicity".....	36

Appendices

- A. Preparation of Solutions
- B. Sources of Reagent Grade Chemicals and Other Supplies
- C. Trouble Shooting the BOD₅/CBOD₅ Test
- D. Glossary

Supplement: Compact Disk with following...

- BOD/CBOD Checklist (editable MS Word® document with references to booklet paragraphs/pages)
- Sample Bench Sheet - Bottle Method ("live" MS Excel® spreadsheet that calculates results)
- Sample Bench Sheet - Graduated Cylinder Method ("live" MS Excel® spreadsheet that calculates results)
- Control Charting Program ("live" Excel® spreadsheet that calculates average and standard deviation, constructs graph) with instructions
- *Toxicity in BOD Testing*
- *Statistical Terms in BOD Testing*
- *The "Perfect" Seed*
- Summary of Significant Changes in the 21st Edition of *Standard Methods* 5210B
- Bonus Documents
